

FAECAL EGG COUNT

HOW TO COLLECT A SAMPLE

1. Collect a **table spoon amount** of fresh manure (from within the last 12-24 hours) in an airtight container or a ziplock bag. Write your horse's name, date, your best contact number and previous deworming history
2. Drop the sample straight to one of our **3 drop off points** closest to you or if not possible then keep it **refrigerated** until you can drop it off (no longer than 72 hours).
3. Please call or text us on **0412 619 740** to let us know you are dropping off a sample. Earlier drop offs are better as they allow us to get them done the same day.

**If you have any questions or concerns please contact us on
0412 619 740.**
